Litefoot Company
2023
Revit, Enscape & Photoshop

BRIEF

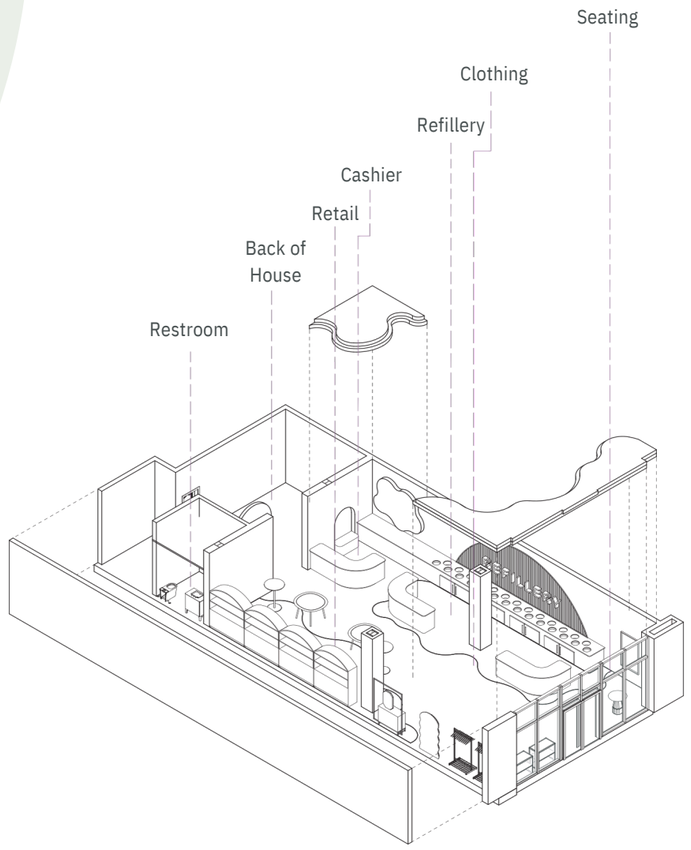

Design a retail store for a sustainable company with the site and building provided. Cater to the client's wants while still adding what may be in their best interest.

CLIENT

Litefoot Company is a sustainable retail shop whose goal is to "support people at every stage of their sustainable journey." The client admires a clean, minimalist design in their shop with a white color palette. This project aims to create a clean, eco-friendly environment that Litefoot is looking for.

CONCEPT

Through the influence of a rainbow, this space will be constructed into one that brings a light and organic feel, intriguing others to begin their sustainable journey. Sustainability, similar to the rainbow, may not be very common, but when crossing your path, it can be a beautiful aspect. Taking inspiration from the organic shapes and reflective light in the rainbow, pastels, curves, and natural materials will be utilized. While keeping the typical neutrals seen in these shops, subtle coloring will be an addition, helping to stand out and captivate the outside audience.

Mystical Antiques
2023
Hand Sketch

BRIEF

Design a personalized vacation apartment for the client provided. Hand sketch all drawings and renderings.

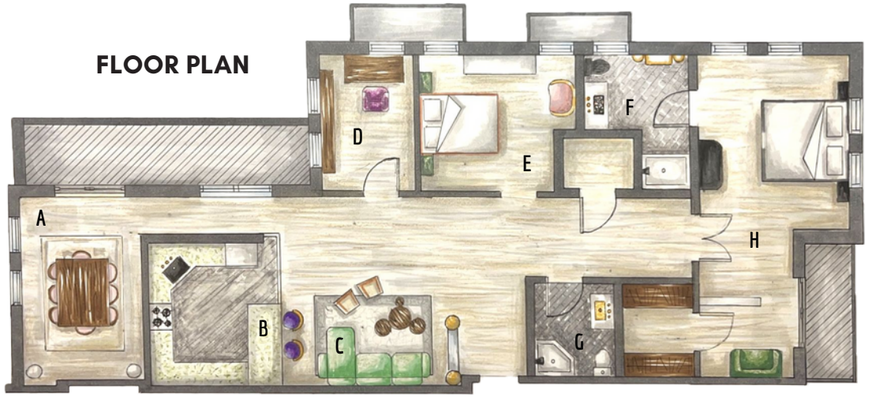

CLIENT

Claire Rosen was the provided client who is known for her photography. Her style could be described as eccentric, mystical, and antiquated. She lives with her cats and enjoys hosting dinners.

CONCEPT

With the use of pastels and organic shapes, a mystical, fairy-tale essence will emerge throughout the apartments spaces. In addition, antique pieces will help to enhance this feeling, while also dimming the spaces in an eccentric manner. These concepts paired together will create a sense of balance with their contrasting aesthetics.

DREAM TRIP: RV Trailer
2021
SketchUp & Enscape

BRIEF

Design an RV Trailer to sleep at least 2 adults given the maximum size provided. Free range for creativity and design.

CONCEPT

This RV trailer is to be a sleek, modern and simplistic design. The inspiration comes from the artist's home bedroom, being a minimal color scheme. The main furniture being designed with neutrals and wood allows for decor of any color or pattern to be added in the space by whomever would invest in this trailer.

THE HELIX
2023
Rhino & Photoshop

BRIEF

Using Rhino, experiment with the different functions to create a different form than the shape that was started with. Apply desired materials to the final step and use Photoshop for after production.

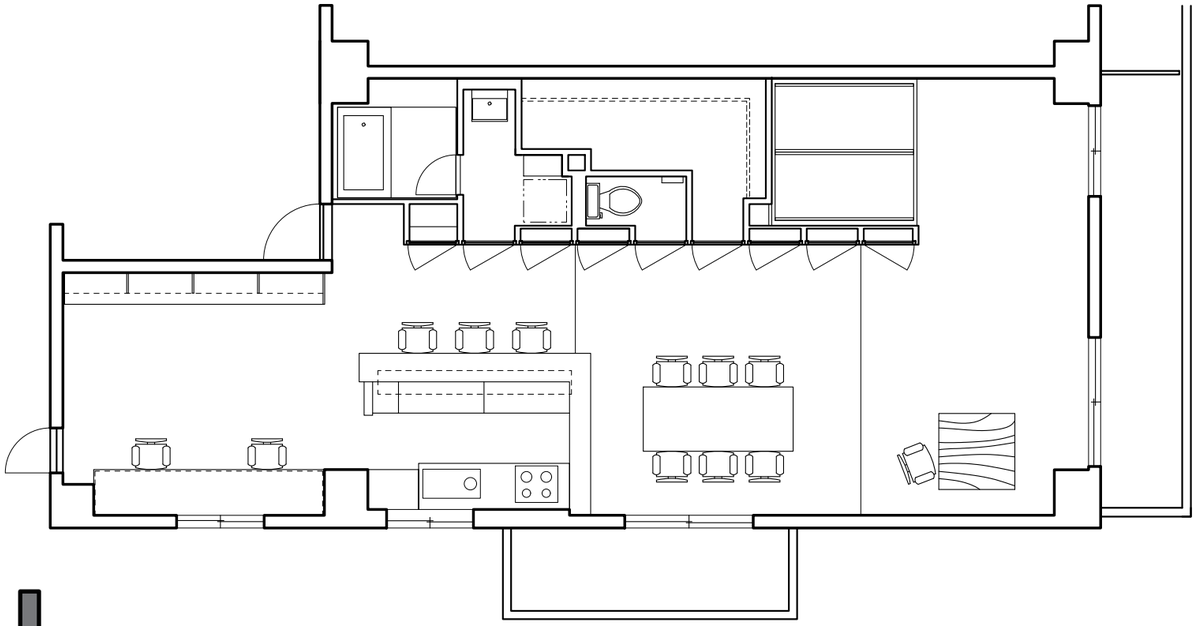

5

FLOOR PLAN
2023
AutoCAD & Photoshop

BRIEF

Select a floor plan of choice to replicate in AutoCAD using line weights accordingly. Transfer into Photoshop to seamlessly add materials and shadows, helping the space come to life.
